Subjects

AIRCRAFT DESIGN AND TECHNOLOGY

NASP and SDI spearhead CFD developments, Feb., p. 27.
Weaving an aircraft, Feb., p . 54.
Airbus 340 takes off, March, p. 14.
Industry seeks tonic for aging aircraft, March, p. 24.
An airlifter for the long haul, March, p. 30.
Paint under pressure, March, p. 40.
An-225 could launch "Interim Hotol," April, p.14.
Facing the crisis in aircraft design education, April, p. 24.
Boeing 777 to bootstrap Japan's aircraft industry, May. p. 16.
Japan's showcase fighter exhibits problems, July, p. 14.
Bravia launches Rolls-powered Tu-204, Aug., p. 25.
A look at the fundamentals, Aug., p. 30.
Surviving Operation Desert Storm, Aug., p. 33.
SURVIAC: A model center for data analysis, Aug., p. 36.
Controlling radar signature, Aug., p. 44.
Army countermeasures target technology advances, Aug., p. 46.
Measuring progress in IR signature technology, Aug., p. 46.
Aircraft battle damage repair: A force multiplier, Aug., p. 50.
Designing aircraft for hardness and repairability, Aug., p. 52.
Hardening against directed energy weapons, Aug., p. 54.
The challenge of commercial aircraft survivability, Aug., p. 55.
Survivability in SAM encounters, Aug., p. 58.
Special propulsion controls for survivability, Aug., p. 60.
Composite actuators: Lightweight and jam-resistant, Aug., p. 61.
NASP funds titanium composite plant, Aug., p. 66.
Joining forces to survive tomorrow's battles, Aug., p. 36.
Getting up to speed in hypersonic structures, Sept., p. 18.
DAMVIBS looks at rotorcraft vibration, Sept., p. 22.
Turning up the heat on aircraft structures, Sept., p. 34.
New materials drive high-performance aircraft, Sept., p. 46.
Electronics show their age, Oct., p. 22.
Composites roll sevens, Oct., p. 26.
Taking the measure of aerodynamic testing, Nov., p. 16.
Probing questions for aerodynamic testing, Nov., p. 30.
The American jet turns 50, Nov., p. 40.
Aerospace '92: Aeroacoustics, Dec., p. 16.
Aerospace '92: Applied aerodynamics, Dec., p. 38.
Aerospace '92: Air transportation, Dec., p. 50.
Aerospace '92: Aircraft design, Dec., p. 54.
Aerospace '92: Aircraft operations, Dec., p. 75.
Aerospace '92: Balloons, Dec., p. 61.
Aerospace '92: Flight simulation, Dec., p. 25.
Aerospace '92: Flight testing, Dec., p. 32.
Aerospace '92: General aviation, Dec., p. 21.
Aerospace '92: Ground testing, Dec., p. 84.
Aerospace '92: Lighter-than-air, Dec., p. 36.
Aerospace '92: Structures, Dec., p. 22.

AVIONICS AND ELECTRONICS

MCMs give superconductors a chance to shine, Oct., p. 44.
Aerospace '92: Digital avionics, Dec., p. 58.
Aerospace '92: Guidance, navigation, and control, Dec., p. 18.

COMMUNICATIONS

Japan expands research on communications satellites, Aug., p. 22.
Aerospace '92: Communications, Dec., p. 76.
Aerospace '92: C³I, Dec., p. 44.

COMPUTERS AND SOFTWARE

CFD: Facing the issues, Jan., p. 4.
A perspective on aerospace CFD, Jan., p. 16.
CFD helps the Air Force fly right, Jan., p. 22.
NASA and CFD: Making investments for the future, Jan., p. 28.
Supercomputers and CFD, Jan., p. 32.
The university's role, Jan., p. 38.
The computation of turbulence, Jan., p. 42.
Soviet CFD: An international perspective, Jan., p. 48.
Making a habit of excellence, Feb., p. 5.
Looking toward the future Navy, Feb., p. 18.
CFD joins the Army, Feb., p. 22.
Industry warms to CFD, Feb., p. 32.
Europe presents a united CFD front, Feb., p. 36.
HOPE looks to CFD for help, Feb., p. 39.
Universities foster CFD growth, Feb., p. 42.
CFD: Where can it take us?, Feb., p. 48.
Automated mission planning: A striking capability, March, p. 34.
A code with dynamic impact, May, p. 42.
Aerospace '92: Artificial intelligence, Dec., p. 72.
Aerospace '92: C³I, Dec., p. 44.
Aerospace '92: CAD/CAM, Dec., p. 71.
Aerospace '92: Computer systems, Dec., p. 63.
Aerospace '92: Design engineering, Dec., p. 14.
Aerospace '92: Interactive computer graphics, Dec., p. 41.
Aerospace '92: Software systems, Dec., p. 47.

ECONOMICS

The rocky road to economic conversion, March, p. 18.
Defense conversion: Can U.S. industry adjust to peace?, June, p. 21.

EDUCATION

The university's role, Jan., p. 38.
Universities foster CFD growth, Feb., p. 42.
A world of differences: Aerospace education abroad, April, p. 36.
Crisis in the classroom, April, p. 5.
Engineering education in the '90s: Back to basics, April, p. 21.
Designing a better engineer, April, p. 30.
Degrees of expertise: A survey of aerospace engineering programs, April, p. 34.
Making the grade with ABET, April, p. 44.

INSTRUMENTATION AND TECHNOLOGY

Seeing beneath the surface with NDE, May, p. 26.
Compton's violent gamma ray universe, June, p. 32.
A Star Wars technology for the stars, July, p. 50.
Aerospace '92: Aerodynamic decelerators, Dec., p. 24.
Aerospace '92: Aerodynamic measurement technology, Dec., p. 12.
Aerospace '92: Fluid dynamics, Dec., p. 30.
Aerospace '92: Space operations and support, Dec., p. 52.
Aerospace '92: Support systems, Dec., p. 17.
Aerospace '92: Survivability, Dec., p. 81.

INTERNATIONAL

Japan focuses on cultivating technology at home, Jan., p. 10.
Europe seeks new defense identity, Jan., p. 12.
ESA delays key manned projects, Feb., p. 13.
Orbital debris: the view from Russia, March, p. 15.
A world of differences: Aerospace education abroad, April, p. 36.
Flying down to Rio, May, p. 5.
Europe extends unified ATC strategy, May, p. 18.
Russia's aerospace technology: Handle with care, June, p. 5.
In a changing world, civil space pursuits continue, June, p. 12.
RAF confirms ASRAAM choice, June, p. 15.
The rush to buy Russian, June, p. 38.
ESA at the crossroads, July, p. 16.
International thrusts in launch vehicle propulsion, July, p. 42.
World Space Congress: Catalyst for cooperation, Aug., p. 5.
Germany opts out of Eurofighter production, Sept., p. 14.
A world of possibility, Oct., p. 5.
APAS: A system with universal appeal, Oct., p.17.
Sweden explores defense collaboration, Nov., p. 12.
Japan mulls partnership for YSX aircraft development, Nov., p. 13.

MANAGEMENT

GOES NEXT goes astray, May, p. 20.
Total quality treatment for science and technology, May, p. 36.
Aerospace '92: Technical information, Dec., p. 78.
MATERIALS
Spraying for strength, Jan., p. 52.
Mir solar batteries: More than meets the eye, Feb., p. 10.
Take it all off–with water, April, p. 48
Composite makers sense changes, June, p. 42.
Materials and structures for a decade of complexity, Sept., p. 5.
Structural dynamics for new launch vehicles, Sept., p. 26.
Interacting for better performance, Sept., p. 30.
Structures that adapt to space, Sept., p. 38.
Missiles and space systems with a material difference, Sept., p. 42.
Aerospace '92: Materials, Dec., p. 74.

MILITARY SYSTEMS

Live fire testing requirements: Assessing the impact, Aug., p. 34.
Survivability requirements, Aug., p. 37.
Designing survivable space systems, Aug., p. 38.

MISSILES

Aerospace '92: Missiles, Dec., p. 68.

POLICY

Crisis in the classroom, April, p. 5.
SEI plans unfold, April, p. 15.
Recycling an arsenal, May, p. 14.
The commercial launch industry: Will it fly on its own?, May, p. 32.
Ups and downs of the new space launcher, June, p. 26.
New directions in propulsion, July, p. 5.
Aerospace and campaign '92, Oct., p. 14.
Engineers must speak out, Nov., p. 5.
Aerospace '92: Legal aspects, Dec., p. 33.
Aerospace '92: Support systems, Dec., p. 17.
PROPULSION AND POWER
STME: Streamlining the engine of change, July, p. 22.
ASRM: Turning in a solid performance, July, p. 26.
Hybrid rockets: Combining the best of liquids and solids, July, p. 30.
Nuclear thermal rockets: Key to Moon-Mars exploration, July, p. 34.
Electric propulsion: The future is now, July, p. 38.
Plasma thrusters from Russia, Sept., p. 51.
Aerospace '92: Aerospace power, Dec., p. 37.
Aerospace '92: Airbreathing propulsion, Dec., p. 34.
Aerospace '92: Electric propulsion, Dec., p. 42.
Aerospace '92: Hybrid rockets, Dec., p. 62.
Aerospace '92: Liquid propulsion, Dec., p. 20.
Aerospace '92: Nuclear thermal propulsion, Dec., p. 28.
Aerospace '92: Propellants and combustion, Dec., p. 83.
Aerospace '92: Solid rockets, Dec., p. 48.
Aerospace '92: Terrestrial energy, Dec., p. 29.
Aerospace '92: Thermophysics, Dec., p. 15.

ROBOTICS

Aerospace '92: Space automation and robotics, Dec., p. 83.

SPACE AND ATMOSPHERIC SCIENCE

New glimpses of the cosmos, March, p. 4.
Mapping Magellan's prospects, Sept., p. 12.
ERS-1: A success for Europe, Oct., p. 19.
Shedding new light on gas dynamics, Nov., p.20.
Holograms go with the flow, Nov., p. 26.
Tracking a particle's progress, Nov., p. 34.
Lenses for gamma rays and X rays, Nov., p. 42.
Aerospace '92: Aerospace maintenance, Dec., p. 57.
Aerospace '92: Astrodynamics, Dec., p. 67.
Aerospace '92: Atmospheric environment, Dec., p. 53.
Aerospace '92: Atmospheric flight mechanics, Dec., p. 43.
Aerospace '92: Life sciences, Dec., p. 46.
Aerospace '92: Plasmadynamics and lasers, Dec., p. 80.
Aerospace '92: Space processing, Dec., p. 13.
Aerospace '92: Space sciences and astronomy, Dec., p. 10.
Aerospace '92: Space systems, Dec., p. 64.
Aerospace '92: Structural dynamics, Dec., p. 70.

SPACE STATION

Space Station Freedom: What if...?, Oct., p. 30.

Career Opportunity Advertisers

Aerospace America

Aerospace America is the leading resource publication of recruitment advertisers to reach the aerospace community's top engineering and scientific professionals. And that's why *Aerospace America*'s "Career Opportunity Section" runs more ads than any other monthly aerospace magazine.

Each month, *Aerospace America* provides more than 150,000 readers with the industry's most comprehensive analysis of critical technology issues. Just the type of informative and in-depth articles aerospace decision-makers define as a "must read" in order to stay on course with the many challenges ahead.

As the flagship publication for the American Institute of Aeronautics and Astronautics (AIAA), the largest organization representing aerospace professionals in aviation, space, and defense, *Aerospace America* is uniquely positioned to support your demanding "cost per hire" recruitment goals.

Give your recruitment program the advantage it needs.

Please send insertion orders and all camera ready copy to: *Aerospace America*, Robin Klombers, Classified Advertising Department, The Aerospace Center, 370 L'Enfant Promenade, SW, Washington, DC 20024-2518.

Phone 202/646-7475 or FAX 202/646-7508.
